10
01

The copy filmed here has been reproduced thanks to the generosity of:

D. B. Weldon Library
University of Western Ontario

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

D. B. Weldon Library
University of Western Ontario

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

INTRODUCTION.

In presenting this Code of Ciphers to the public, it is the aim of the author to supply the want of a system of Cryptography designed for general use, and arranged in conformity with the rules and regulations respecting "secret writing telegrams," adopted by the International Convention of Telegraph Companies, which have been in force since last April.

The book comprises a vocabulary of upwards of 18,000 words, together with a collection of banking and mercantile terms, phrases and sentences in common use; also, some geographical names, and tables of figures, &c., each of which is represented by a cipher.

To meet the requirements of persons who make frequent use of technical words or phrases peculiar to their business, not contained in the vocabulary, a number of blanks have been provided with ciphers.

The system is based on a combination of any three letters of the alphabet; the first letter of the cipher indicating the page; the second, the column which contains the word, phrase, or sentence it is required to express, and the third letter is found immediately opposite such word, phrase, or sentence; thus, "KRW" is the cipher for the word "Government."

Keys are arranged by a mutual understanding between correspondents, to change one or more letters of the cipher, according to a pre-designed transposition of the letters of the alphabet, thus altering the combination. For instance, say it is agreed upon to change the first letter of the cipher to the

next following letter of the alphabet, and it is desired to express the word "Commerce;" on reference to the vocabulary, this word is found to be represented by the combination "ESY." The writer of the despatch would accordingly write "FSY," and the reader, knowing the key, would change the first letter, F, back to E, and find the cipher to stand for the word "Commerce."

By the use of the 2nd Table of Figures, page 112, any number up to 10,000, and all round numbers up to 49,900 millions may be expressed by a single cipher. An inexpensive means of cabling numbers is thus afforded.

The letters of the alphabet will be found on page vii., in a form convenient for transposition by persons using the Code.

It may be mentioned, as an exemplification of the absolute secrecy ensured by the use of these ciphers, that a message of only two words may be rendered by upwards of 310 millions of different keys. It will be thus seen that correspondents may change the keys as often as they may deem it expedient to do so.

The following examples will serve to illustrate the working of the Code:—

EXAMPLES.

I.

Have arrived safe. All well. Am writing.
Yvj.

II.

Everything satisfactorily arranged.
Iwj ufc blm.

III.

The return of our candidate is certain.
Wnk taw pqv pwh dps ml dxb.

IV.

Have transferred to you by cable, through the London and County Bank,
£573 stg.
Yvd yzu cyw.

V.

Forty-seven thousand five hundred millions.
Say.

EXPLANATION OF TABLE.

In the foregoing table the number in each square is represented by the letter above, and the letter to the left, thus :

Gd stands for 154.

The table, it will be observed, gives numbers up to 500 by the use of two letters. As, however, it is desirable that all the ciphers should be composed of the same number of characters, a letter is inserted between these two.

This centre letter is, either a mere expletive, and represents no value, or it denotes the number to be added to that represented by the other two; or else it gives the number by which that shewn on the table is to be multiplied as per scale appended giving the value of these centre letters, thus :

Gkd means 7654; the first and last letters indicating 154; and, K, the centre letter, denoting the number to be added, 7500.

God means 154,000,000; G D standing for 154; and C signifying to multiply by 1,000,000.

Up to 1000, the ciphers used in the table, are not employed elsewhere in the code; but in giving higher numbers, the combinations availed of, already represent words in the vocabulary. The sense of the despatch will always clearly indicate that figures are meant.
